

ENHANCE LEARNING & ACCOUNTABILITY WITH MOBILE SKILLS ASSESSMENT

A Better Way To Teach & Measure Field Skills

From the first days at the academy through a lifetime of learning, skills assessments are central to the successful development and preparation of firefighters. But delivering consistent evaluations and documenting student performance for accountability is challenging when relying on paper-based skills sheets and training curriculum.

EVALS is the most dynamic mobile skills assessment and tracking solution for public safety, providing students and instructors with powerful tools to improve performance and skills retention. Working as a standalone solution or as part of FireRescue1 Academy's learning management system, EVALS helps departments, colleges and academies manage their academy program and deliver transparent, effective, mobile field training evaluations.

Transform Training With EVALS

With EVALS mobile skills assessment solution, you can:

- Record live training and review videos to reinforce learning and correct performance
- Track and document student performance for transparency and accountability
- Configure custom Job Performance Requirements using real-world scenarios to quantify skills-based performance
- Deliver consistent training evaluations across multiple instructors and classes
- Track on-the-job training hours and performance requirements

KEY FEATURES

Measure performance and progress through realistic scenarios

Perform field and video assessments without an internet connection

Use Digital Taskbooks to assign training, track signatures and administer exams

Let our experts build custom skills sheets, taskbooks, forms and exams to fit your training needs
